KEY ACTIVITIES THIS WEEK

DATE	ACTIVITY	STATUS
Jul 28	Reviewed Belize's competition schedule for the Central American and Caribbean Games and planned the on-site monitoring agenda for Santo Domingo. Participated in the Panam Sports methodologists' meeting and continued remote monitoring of Belize athletes competing internationally	Completed
Jul 30	Travelled to Santo Domingo and began direct monitoring of Belize at the Central American and Caribbean Games, attending the basketball competition immediately after arrival and coordinating accreditation and delegation access with the Chef de Mission.	Completed
Jul 31	Visited the Athletes' Village and held an extended technical exchange with Belize Chef de Mission Sharon, covering delegation conditions, current sport development challenges and opportunities for future improvement.	Completed
Aug 1	Conducted field monitoring of Belize's basketball semifinal and men's road cycling participation. In cycling, supported the delegation before and during part of the road race and assessed the technical support available to the athlete	Completed

WEEKLY PROGRESS TREND (ALL INITIATIVES)

THIS WEEK'S OBJECTIVES

- 1 Conduct direct field observation of Belize's participation in the Central American and Caribbean Games to assess athletes in competition and understand the operational and technical conditions surrounding their participation.

Expected result — Generate first-hand evidence on competition performance, athlete support and delegation conditions that can be used to identify practical areas for improvement in the preparation of future international delegations.

Success indicator — On-site observation of Belize in basketball and cycling, direct interaction with athletes and delegation personnel, and identification of specific technical and operational considerations affecting competition support.
- 2 On-site observation of Belize in basketball and cycling, direct interaction with athletes and delegation personnel, and identification of specific technical and operational considerations affecting competition support.

Expected result — Build a broader technical picture of Belize's current international competitive level across sports and identify information that can contribute to future athlete planning and competition preparation.

Success indicator — Build a broader technical picture of Belize's current international competitive level across sports and identify information that can contribute to future athlete planning and competition preparation.
- 3 Use the presence at the Games to gather technical and operational perspectives from key stakeholders involved in international sport and Belize's delegation.

Expected result — Expand the technical understanding of Belize's participation beyond competition results by incorporating the experience of delegation leadership, Panam Sports technical coordination and other methodologists.

Success indicator — Technical exchanges completed with the Belize Chef de Mission, Panam Sports technical leadership and another methodologist, generating relevant inputs for the continued development of the assignment

EXECUTIVE SUMMARY

This week marked an important transition from remote competition monitoring to direct field assessment of Belize's participation at the Central American and Caribbean Games. Following accreditation approval, on-site monitoring was conducted in basketball and cycling, complemented by a visit to the Athletes' Village and direct engagement with the Chef de Mission. Field observation provided evidence beyond competition results, particularly regarding the operational and technical conditions surrounding athletes. A specific support gap was identified in cycling, where dedicated mechanical assistance was not available. Remote monitoring of Belize athletes at the Commonwealth Games continued in parallel. Technical exchanges with Panam Sports and another project methodologist also strengthened coordination and provided additional perspectives for the ongoing assignment.

INITIATIVE PROGRESS

Strategic Competition Planning and Preparation Support

HIGH PERFORMANCE

● In Progress

▲ 1 vs. last week

The initiative moved from pre-Games planning and remote monitoring into direct field assessment at Santo Domingo 2026. Competition observation, access to the Athletes' Village and interaction with athletes and delegation leadership provided first-hand evidence on performance and support conditions. These findings will inform the technical review of Belize's participation and future Games preparation.

Federation Performance Planning and Technical Coordination

STRATEGIC

● In Progress

No change vs. last week

International competition monitoring added a new evidence layer to the federation assessment process. Observing athletes under Games conditions helped connect previous federation-level findings with actual competition demands, particularly regarding athlete pathways, technical support and the preparation required for international participation.

PANAM SPORTS SUPPORT NEEDED

Continue facilitating technical coordination and access to relevant information from major Games, supporting the integration of field observations and competition results into the post-event evaluation and future planning process.

CHALLENGES

● High priority ● Pending Follow-up TECHNICAL

Field observation in road cycling identified limited dedicated technical support for the Belize athlete, including the absence of mechanical assistance available specifically to the delegation during the event.

Action — Review minimum sport-specific support requirements before future international events and define in advance how essential technical services will be provided when Belize travels with small delegations.

● Medium priority ● Addressed LOGISTICAL

Access to some competition venues, particularly sailing, was limited by distance from Santo Domingo and transportation/organizational conditions, restricting the possibility of direct observation despite prior coordination.

Action — For future Games, review venue locations and transportation requirements in advance when planning technical monitoring, particularly for sports conducted outside the main competition area.

NEXT WEEK FOCUS

Consolidate observations and results from both international Games, identify key technical lessons and recommendations, and integrate this evidence into the ongoing federation assessment and future competition planning process.
