KEY ACTIVITIES THIS WEEK

DATE	ACTIVITY	STATUS
Jun 15	Support national federations in preparing for safeguarding implementation by collecting Safeguarding Officer appointment forms, following up with federations still completing submissions, and beginning the attendance list for the mandatory July 4 workshop.	Completed
Jun 15	Follow up on sport psychology support for athletes preparing for upcoming multisport competitions by reviewing the updated quote submitted by the interviewed sport psychologist and submission to capacity officer for further review by DOC president and further consideration.	Completed
Jun 20	Continued school visits and presentations to children at school assemblies about olympic value and direct coordination directly with Ministry of Education representatives, school principals, and the Sports Division to confirm OVEP Teacher Training Workshop participation and strengthen stakeholder engagement before the upcoming event.	Completed
Jun 20	Conducted individualized working sessions with national federations to support the development of athlete, coach, and referee progression pathways from grassroots participation to developing and performance levels.	In Progress

STAKEHOLDER ENGAGEMENT OVERVIEW

4 total engagements this week, across 4 stakeholder types.

WEEKLY PROGRESS TREND (ALL INITIATIVES)

3

THIS WEEK'S OBJECTIVES

- 1 Strengthen collaboration between the Dominica Olympic Committee, the Ministry of Education, and the Ministry of Sport as well as affiliated federations through shared planning, coordinated communication, and joint participation in Olympic Values Education Programme activities.

Expected result — Improved institutional relationships and stronger stakeholder engagement in OVEP Teacher Training Workshop preparations with leaders in schools, federations and sports division being better informed, feeling more valued, and encouraged to actively engage participants to plan their attendance. National federations support by appointing participants and some national federations also contribute equipment for the workshop.

Success indicator — Direct communication maintained with the Ministry of Education focal point, Ms. Walsh, and additional communication conducted with every primary school principal in the country Sports Division lead Mr. Shillingford and every school principal is personally thanked in advance for their collaboration and informed of the importance and value of their teachers' participation. Increased coordination between education and sport stakeholders in support of the OVEP workshop and broader Olympic values initiatives through encouragement of advanced and careful selection of committed participants for the upcoming event. Ministry of Education encourages school principals to appoint school representatives. Continued school visits strengthen connection between DOC and ministry of education stakeholders including teachers, students, principals and parents and attract more interest in sports from public and ministry of sport. National federations commit to appointing participants.

- 2 Support national federations in strengthening their organizational capacity by developing clearer athlete, coach, and referee progression pathways from grassroots participation to developing and performance levels, while also supporting administrative systems such as operational documentation, shared calendars, financial planning, and safeguarding structures. This includes individualized working sessions, federation-specific guidance, collection of Safeguarding Officer appointment forms, and preparation for the mandatory Safeguarding Workshop scheduled for July 4, 2026, with local safeguarding expert Jemma Azille.

Expected result — National federations begin to establish structured and realistic athlete, coach, and referee pathway documents, placed in the shared DOC folder, reflecting each federation's current capacity, available resources, competition opportunities, and long-term development needs. Federations also make progress in formalizing safeguarding responsibilities by appointing designated Safeguarding Officers and confirming participation in the July 4 mandatory workshop. The DOC Treasurer Mr. Ducreay meets with sport methodologist to reviewing the financial planning templates created to support federations and provide feedback to strengthen their practical use. A local sport methodologist also begins training sessions with sport methodologist to better understand the templates and tools available, helping prepare for future individualized support to national federations.

Success indicator — Individual in-person and/or Zoom working sessions completed with targeted national federations. Sport-specific athlete, coach, and referee pathway document drafts developed and placed in the shared DOC folder. Follow-up meetings scheduled with federations to continue pathway development and administrative support. Financial planning templates reviewed by the DOC Treasurer, with feedback provided for improvement. Local sport methodologist begins training on available federation support templates and documentation tools. Safeguarding Officer appointment forms collected from federations that have completed the process. Follow-up communication maintained with federations still submitting Safeguarding Officer appointment forms. Consultations provided to federations requiring clarification or support in identifying and appointing appropriate Safeguarding Officers. Attendance list initiated for appointed officers participating in the mandatory Safeguarding Workshop on July 4, 2026. Increased awareness among federations of the importance of safeguarding structures, formal responsibilities, documentation, and workshop participation.

- 3 Advance support for athletes preparing for upcoming multisport competitions by following up on sport psychology support options and reviewing the proposed quote for services that could assist athletes with mental preparation, confidence, focus, competition readiness, and performance planning.

Expected result — The Dominica Olympic Committee begins to explore practical sport psychology support for athletes preparing for multisport events, with a clearer understanding of the possible service structure, cost, and implementation options. The follow-up quote provides a basis for internal review and decision-making regarding how sport psychology services could be integrated into athlete preparation.

Success indicator — Follow-up quote received from the sport psychologist for athlete support services. Quote reviewed in relation to the preparation needs of athletes targeting upcoming multisport competitions. Quote submitted to the Capacity Officer for review and further discussion with the DOC President. Initial steps taken toward identifying how sport psychology support could strengthen athlete readiness, confidence, and performance preparation. Continued attention given to athlete-centered support services beyond technical and physical preparation.

EXECUTIVE SUMMARY

This week, priority work advanced in support of the Dominica Olympic Committee's institutional, technical, and athlete-support objectives. Collaboration was strengthened with the Ministries of education and sport through school principals and sports Division leadership engagement in preparation for the OVEP Teacher Training Workshop. Follow-up with 58 school principals and the Sports Division lead supported participant confirmation and emphasized the importance of selecting committed representatives. Federation capacity-building progressed through individualized sessions and scheduling of follow up sessions. Safeguarding readiness also advanced through collection of Safeguarding Officer appointment forms, follow-up with federations still submitting forms, and initiation of the July 4 workshop attendance list. High-performance support was explored through receipt and submission of a sport psychology quote for review by the Capacity Officer and DOC President. Key challenges remain around federation availability for administrative work, school follow-up demands, and delayed confirmation of a meeting with the Massacre facility coordinator.

INITIATIVE PROGRESS

Formal Government and Dominica NOC Cooperation

● In Progress

STRATEGIC

▲ 5 vs. last week

This week's activities supporting this initiative focused on strengthening collaboration between the Dominica Olympic Committee, the Ministry of Education, the Ministry of Sport, schools, and National Federations through the upcoming OVEP Teacher Training Workshop. Progress included direct communication with the Ministry of Education focal point, school principals, and Sports Division leadership. Schools were contacted to confirm teacher participation, principals were thanked for their collaboration, and the importance of selecting committed representatives was emphasized. Mr. Shillingford was also personally informed and encouraged to support Sports Division officer participation. These efforts helped strengthen institutional relationships and improve stakeholder engagement before the workshop.

Targeted Technical Expertise & Coach Multiplication

● In Progress

DEVELOPMENT

▲ 1 vs. last week

This week's progress focused on providing targeted technical assistance to National Federations and preparing key capacity-building opportunities for federation representatives, coaches, educators, and safeguarding officers. Individualized working sessions were completed with Aquatics and Cycling to support the development of athlete, coach, and referee pathway documents from grassroots participation to developing and performance levels. Follow-up meetings with Athletics, Volleyball, and Basketball were scheduled or rescheduled based on federation leadership availability and other community responsibilities. Safeguarding support also advanced through the collection of Safeguarding Officer appointment forms, continued follow-up with federations still completing submissions, and initiation of the attendance list for the mandatory Safeguarding Workshop scheduled for July 4, 2026, with local safeguarding expert Jemma Azille. Preparation for the OVEP Teacher Training Workshop also continued through technical coordination around participant profile, expected attendance, workshop needs, available equipment, and practical delivery requirements.

High Performance & Institutional Capacity Acceleration

HIGH PERFORMANCE

In Progress

No change vs. last week

This week's progress focused on exploring targeted high-performance support for athletes preparing for upcoming multisport competitions. A follow-up quote was received from the sport psychologist for potential athlete support services and was submitted to the Capacity Officer for review with the DOC President. This step supports further internal discussion on how sport psychology services could assist athletes with mental preparation, confidence, focus, emotional regulation, competition readiness, and performance planning. The initiative remains active as the DOC considers practical options for integrating sport psychology support into athlete preparation for future multisport events and broader high-performance development needs.

Shared Services and Coordination

ADMINISTRATIVE

On Hold

▼ 1 vs. last week

This initiative remains on hold pending confirmation of a rescheduled meeting with Mr. Leblanc, who coordinates services at the Massacre Multisport Facility. The previously planned meeting was cancelled, and a new time has not yet been confirmed. Follow-up efforts continued this week, including seeking shared contacts who may help facilitate communication and support the scheduling of a meeting. In parallel, other possible spaces and support models are being explored to determine how the Dominica Olympic Committee could better assist National Federations through shared-use facilities, coordinated access to training or meeting spaces, and practical support services.

PANAM SPORTS SUPPORT NEEDED

Support from Panam Sports would be appreciated in facilitating a brief strategic learning meeting with Jimena Saldaña and, if possible, Sara Rosario, either jointly or separately, to help align and adjust Dominica's federation support model with regional best practices.

CHALLENGES

High priority In Progress COORDINATION

Confirming OVEP workshop participants names required significant individual follow-up with 58 schools and principals, as accurate attendance depends on each school appointing committed representatives.

Action — I contacted schools and sports division lead directly, thanked principals for their collaboration, and emphasized the importance of selecting teachers who are committed to

attending and applying the workshop content after the training. Additional follow up will be needed next week with some schools.

● Medium priority ● Pending Follow-up POLITICAL

A rescheduled meeting with Mr. Leblanc, who coordinates services at the Massacre Multisport Facility, has not yet been confirmed despite at least 5 of my attempts to reach out. This delays exploration of shared-use facility options for National Federations.

Action — I am seeking shared contacts to help facilitate communication and schedule the meeting. In parallel, I am also exploring other possible spaces and support models that could help the DOC provide shared services or coordinated access for National Federations.

● Medium priority ● In Progress ADMINISTRATIVE

Progress with some National Federations remains slower than expected because many federation leaders are volunteers or hold full-time professional and community responsibilities during regular working hours. As a result, meaningful progress on pathway documents, planning templates, safeguarding requirements, and administrative systems often requires significant one-on-one guidance during evenings or weekends.

Action — Progress has been strongest through individualized evening and weekend support sessions with federations. To accelerate this work, local sport methodologists should be trained quickly on federation templates so they can guide National Federations at times that better match their availability. I will consider realistic and fair scheduling options that allow some evening or weekend support without overextending local staff.

NEXT WEEK FOCUS

Confirming OVEP and Safeguarding workshop participant names, coordinating workshop details with facilitators, exploring shared facility use for affiliates, continuing public engagement, supporting National Federations, and training Staci Hill for federation support.
