4 total engagements this week, across 4 stakeholder types.

WEEKLY PROGRESS TREND (ALL INITIATIVES)

THIS WEEK'S OBJECTIVES

- 1 Continue to build and strengthen the working relationship between the Dominica Olympic Committee and the Ministry of Education through Olympic Values Education Programme outreach, school engagement, teacher participation, and future educational partnerships.

Expected result — The Dominica Olympic Committee continues to develop a constructive and visible relationship with the Ministry of Education, primary and secondary schools, and education stakeholders through coordinated school visits, teacher engagement for the OVEP workshop, and follow-up planning with the National Olympic Academy. This relationship is expected to support greater integration of Olympic values education into school communities and create opportunities for continued collaboration with primary and secondary schools.

Success indicator — At least 50% of invited schools confirm the full names and contact information of their teacher participants for the OVEP workshop before the end of the reporting week. The Local Sport Methodologist/Federation Support Officer contacts remaining schools and sends reminders to submit participant names and contact information by July 1, 2026. National Olympic Academy members include school engagement and continued collaboration with the Ministry of Education as part of their agenda and future goals. The National Olympic Academy identifies OVEP as a key entry point for building stronger relationships with primary schools, secondary schools, and future partners such as the University of the West Indies. The final school visit of the June outreach period is completed successfully at a secondary school. Arrangements are made with the secondary school for students to attend the Olympic Day celebrations with their sport teachers on Saturday, June 27, 2026.

- 2 Continue capacity building for National Federations through direct support, practical training, governance guidance, and the development of a local federation support system that can continue assisting federations with planning, administration, integrity, and performance documents.

Expected result — National Federations receive continued support to strengthen their internal systems, including safeguarding preparation, transparent athlete selection procedures, athlete pathway development, and the use of shared administrative folders. The Local Sport Methodologist/Federation Support Officer begins structured training with the Sport Methodologist to understand the process of supporting federations, developing administrative documents, creating protocols, using available Panam Sports and International Federation resources, and encouraging proactive planning for future Games qualification pathways.

Success indicator — A minimum of 50% of National Federations confirm their designated Safeguarding Officer or participant for the upcoming safeguarding workshop. An in-person workshop on the development of clear and transparent selection criteria is conducted for National Federations. Federations unable to attend the in-person workshop receive the presentation slides by email and are offered an individual follow-up session if needed. Individual sessions are held with at least two out of three targeted sports to continue or complete their Athlete Pathway Development document. Targeted Federations are introduced to the Local Sport Methodologist/Federation Support Officer, who will assist them with completing documents in the Operations, Performance, and Integrity shared folders. The Local Sport Methodologist/Federation Support Officer, Staci Hill, begins training with the Sport Methodologist to understand the National Federation support process. Training begins with an orientation to the purpose of the federation shared folders, including Operations, Performance, Integrity, Finance, and Governance/Monitoring documentation. The Local Sport Methodologist/Federation Support Officer begins learning how to support federations in preparing administrative documents, protocols, templates, meeting records, selection criteria, safeguarding documents, and planning tools. The Local Sport Methodologist/Federation Support Officer begins shadowing federation support meetings to become familiar with common challenges, federation needs, and the practical steps required to help federations complete documents. The Local Sport Methodologist/Federation Support Officer is introduced to key resources available through Panam Sports, Olympic Solidarity, International Federations, and other sport development pathways. The Local Sport Methodologist/Federation Support Officer begins learning how to encourage federations to move from event-by-event planning toward proactive, forward-looking preparation for future regional, continental, Commonwealth, and Olympic qualification pathways. The Local Sport Methodologist/Federation Support Officer begins becoming familiar with sport-specific athlete development and qualification pathways.

so that federations can be encouraged to plan earlier and more strategically for future Games participation.

- 3 Objective Encourage Collaborative and Centralized Approaches to Training Space Use Begin encouraging National Federations and sport leaders to consider more centralized, coordinated, and collaborative approaches to the use of available training spaces and sport facilities. This priority aims to support more efficient use of limited facilities, improve communication around space needs, and explore whether the Dominica Olympic Committee could potentially play a stronger coordinating role in helping National Federations access and share suitable training spaces.

Expected result — Initial conversations are started with National Federations, facility contacts, the DOC President, and the Capacity Officer regarding the current challenges federations experience when trying to access safe, suitable, and consistent training spaces. Preliminary information is collected on facility access challenges, booking processes, federation needs, and possible shared-use opportunities. This information begins to inform a draft analysis of potential facility solutions for further discussion with DOC leadership. The goal during this reporting period is not to finalize a facility access system, but to begin identifying the main issues, clarify existing processes where possible, and prepare a more developed presentation and analysis for consideration by the DOC President and Capacity Officer in the following week.

Success indicator — Initial discussions are held with selected National Federations regarding their current training space needs, challenges, scheduling limitations, and preferred training times. Preliminary information is collected on possible shared-use spaces, including current usage patterns, booking contacts, donation or rental expectations, and access challenges. Communication is initiated with relevant facility contacts to better understand existing booking processes and possible requirements for access. A brief discussion is held with the DOC President and Capacity Officer regarding the need to explore more coordinated and collaborative approaches to training space access. Facility access challenges identified by federations begin to be documented for future discussion with DOC leadership. Possible facility solutions are initially explored, including clearer booking procedures, shared schedules, centralized coordination, facility partnerships, transport considerations, and potential use of indoor spaces during rainy periods. A draft presentation and preliminary analysis of possible facility solutions is started in preparation for further development and presentation to the DOC President and Capacity Officer. Further development of the facility analysis, stakeholder follow-up, and presentation of possible options are identified as tasks for the following reporting period. The discussion helps begin positioning facility access as a cross-federation issue that may benefit from coordinated planning, shared systems, and strategic partnerships.

EXECUTIVE SUMMARY

This week, progress continued across Olympic education, federation capacity-building, stakeholder engagement, and early facility coordination. Olympic Day celebrations brought together National Federations, schools, families and community members, strengthening DOC visibility and promoting the Olympic values of friendship, respect and excellence. OVEP preparation required extensive follow-up with school principals, education stakeholders, the Public Service Union, Panam Sports and Ms. Silvia Dalotto to confirm participants and coordinate logistics. Federation support advanced through a session on transparent selection criteria, individual sessions with Volleyball and Athletics, follow-up communication to all federations, and continued training of Staci Hill as the local federation support person. Facility visits and inquiries helped clarify booking processes, access challenges and possible shared-use options. Key challenges included slower responses from some schools and less active federations, delays in facility coordination with external stakeholders, and postponed discussion on high-performance sport psychology support pending DOC leadership guidance.

INITIATIVE PROGRESS

Targeted Technical Expertise & Coach Multiplication

● In Progress

DEVELOPMENT

6/10

No change vs. last week

Progress was made in identifying a committed individual for the Panam Sports targeted technical expertise opportunity. One suitable person has been identified so far, and National Federations were asked to designate individuals able to contribute consistently. A training session on transparent criteria was delivered, including suggestions for involving coaches in identifying fair selection processes. Clear expectations and deadlines for administrative work were communicated, and training of the local federation support person is well underway. Public promotion through social media and radio will also be recommended.

High Performance & Institutional Capacity Acceleration

● In Progress

HIGH PERFORMANCE

5/10

No change vs. last week

Updates were received from a swimming high-performance athlete preparing for the CAC Games, as well as from some athletics athletes training abroad. However, more consistent communication and progress updates are still needed from all high-performance athletes and coaches. Sport psychology support remains on hold, possibly due to budget considerations or other NOC priorities. With CAC Games and Commonwealth Games preparation approaching, feedback is needed from the DOC President and Capacity Officer on whether to continue, adjust, pause, or refocus this objective, including possible lower-cost targeted support or greater emphasis on Youth Olympic Games pathway planning. One committed individual identified so far for Panam Games. Progress was made in identifying a committed individual for the Panam Sports targeted technical expertise opportunity. One suitable person has been identified so far, and National Federations were asked to designate individuals able to contribute consistently. A training session on transparent criteria was delivered, including suggestions for involving coaches in identifying fair selection processes. Clear expectations and deadlines for selection criteria work were communicated, and training of the local federation support person underway. Public promotion through social media and radio of opportunities for Panam Sport Coaching Certificate program will also be recommended.

Formal Government and Dominica NOC Cooperation

● In Progress

STRATEGIC

6/10

No change vs. last week

Progress continued through Olympic Day, school engagement, OVEP follow-up, and continued collaboration with education stakeholders. School visits, calls with principals, teacher participation follow-up, and Olympic Day activities helped strengthen practical relationships between DOC, schools, National Federations, and the wider education sector. The National Olympic Academy also identified opportunities to build on OVEP and Olympic Day to support future educational partnerships, including stronger links with schools and other institutions.

Shared Services and Coordination

● On Hold

ADMINISTRATIVE

3/10

No change vs. last week

progress was made through facility visits and inquiries at Massacre, WAWU, the Public Service Union, Cane Mill / Old Mill Cultural Centre, the National Stadium, and UWI classrooms. These visits helped clarify possible training and meeting spaces, booking processes, rental or donation requirements, and access challenges experienced by federations. A draft analysis of possible shared-use facility options was started for further development next week.

Support from Panam Sports through the planned meeting with Jimena Saldaña would help confirm alignment of the local federation support role and advise on its title/framing. Staci Hill is being trained through templates, meeting exposure and shadowing to gradually support federations independently.

CHALLENGES

● High priority ● In Progress ADMINISTRATIVE

A substantial amount of time was required for OVEP school confirmations, including calls, reminders, in-person follow-up, and communication with principals and education stakeholders. This work was necessary to support strong workshop participation, but it reduced the time available for other strategic planning tasks during the week.

Action — Continue compiling the confirmed OVEP participant list, follow up with remaining schools, and support the local federation support person / sport methodologist in assisting with calls and administrative tracking so that strategic work can also continue

● High priority ● In Progress OPERATIONAL

Progress in identifying a clear solution for centralized shared-space booking and facility coordination has been slower than expected because several required inputs depend on external stakeholders, including facility coordinators, venue managers, and government or institutional contacts. Communication delays and difficulty confirming meetings have slowed the process of clarifying booking procedures, costs, availability, and access rules.

Action — Continue following up with facility contacts and seek support from DOC leadership where higher-level communication may help clarify access, booking authority, and possible shared-use arrangements. In parallel, continue documenting available spaces, known booking processes, federation needs, and possible coordination models so that a more complete briefing can be presented to the DOC President and Capacity Officer next week.

● Medium priority ● In Progress TECHNICAL

Some less active National Federations have not yet responded consistently to invitations, emails, or support opportunities. This limits their ability to benefit from the capacity-building support, templates, training sessions, and individualized guidance currently being provided to more active federations.

Action — Continue communicating availability for individual support sessions and encourage all federations to engage with the shared folders, transparent criteria training, safeguarding requirements, and athlete pathway documents. Additional follow-up may be needed from DOC leadership or the local federation support person to encourage broader federation participation.

● Medium priority ● In Progress COORDINATION

Discussion and decision-making around high-performance athlete support, including possible sport psychology services, had to be postponed due to other urgent operational priorities

Action — Feedback is needed from the DOC President and Capacity Officer on whether to continue pursuing sport psychology support, adjust the approach to a more targeted or lower-cost option, or temporarily refocus high-performance planning toward Youth Olympic Games pathway preparation only instead of continuing to focus on fast approaching CAC games and Commonwealth Games.

NEXT WEEK FOCUS

Federation follow-up meetings and local sport methodologist/federation support training through shadowing; final OVEP/Safeguarding confirmations, certificates and logistics; press release distribution; facility-use

recommendations and marketing support to promote the Panam coach course.
