☰ KEY ACTIVITIES THIS WEEK

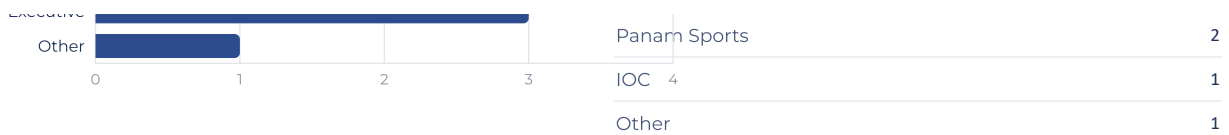

DATE	ACTIVITY	STATUS
Jun 30	Assist Olympic Academy members, to meet, create agenda, create next steps, connect with Barbados Olympic Academy and schedule meetings with Olympic Champion Thea Lafornd and renowned national scholar Dr. Lennox Honychurch	● Completed
Jul 1	Communication with Safeguarding Workshop and OVEP workshop facilitators:Maintained communication with the Safeguarding Workshop and OVEP Workshop facilitators to support final preparation for the upcoming workshops. Communication included reviewing arrangements, confirming workshop expectations, supporting participant coordination, and helping ensure that the DOC team was prepared for the delivery of both workshops. The communication also supported alignment between the international facilitators, local DOC staff, and the Methodologist's ongoing work with National Federations. Particular attention was given to ensuring that these workshops are not seen as isolated events, but as part of a broader capacity-building process connected to safeguarding, Olympic values, school sport, youth development, and federation governance.	● Completed
Jul 28	Provided practical training and guidance to the Federation Support Officer on how to research and identify qualification pathway criteria for future multi-sport games and major events. The training focused on how to support National Federations in building clearer high-performance objectives that are not only focused on immediate competitions, but also on longer-term athlete development and future qualification opportunities. This included guidance on reviewing official qualification systems, technical manuals, federation websites, and past qualification examples. The purpose was to help the Federation Support Officer understand how to assist federations in connecting their athlete pathway documents to future events such as CAC Games, Pan American Games, Youth Pan American Games, Youth Olympic Games, and Olympic Games pathways.	● Completed
Jul 30	Prepared and shared written communication to the Minister of Sports, the DOC President, and the Massacre facility manager regarding the urgent need to clarify and resolve the Massacre shared facility issue. The communication outlined the importance of addressing the facility access and coordination matter in a timely way, especially because several federations require predictable training spaces and clear booking procedures to support athlete development, planning, and preparation.	● Completed

Executive

4 total engagements this week, across 3 stakeholder types.

WEEKLY PROGRESS TREND (ALL INITIATIVES)

THIS WEEK'S OBJECTIVES

- 1 To support the final preparation, coordination, and readiness for the Safeguarding Workshop and the Olympic Values Education Programme Workshop, ensuring that facilitators, participants, DOC staff, and supporting stakeholders are properly informed, organized, and prepared.

Expected result — The Safeguarding Workshop and OVEP Workshop are ready for successful implementation, with confirmed participants, coordinated facilitators, prepared attendance and support documents, clarified roles, and final communication shared with all relevant stakeholders.

Success indicator — Confirmed participants for the Safeguarding Workshop and OVEP Workshop Coordination completed with workshop facilitators Final communication shared with participants and facilitators Workshop logistics reviewed with DOC team Attendance sheets and registration support prepared Roles and responsibilities clarified among DOC staff and support team Participants informed about dates, times, venue, and expectations Facilitators supported with local information and coordination needs Workshops ready to proceed as planned

- 2 Training of Federation Support Officer and establishment of connections and work flows

Expected result — To support the development of the local federation support role by training the Federation Support Officer in practical workflows connected to federation follow-up, document review, athlete pathway planning, qualification pathway research, communication, and weekly reporting.

Success indicator — The Federation Support Officer becomes more confident and prepared to support National Federations directly, understands how to work through federation folders, identify missing documents, help federations organize their priorities, and report progress in a clear and structured way. Success Indicators: Meaningful connections established with National Federations and key stakeholders Federation Support Officer has resources to begin carrying out work more independently Federation Support Officer has a format for workflow and reporting Federation Support Officer understands how to follow up with federations in a supportive and practical way Federation Support Officer understands how to identify qualification criteria and connect them to federation high-performance plans Federation Support Officer has a clearer understanding of how to communicate progress, challenges, and next steps to DOC leadership and the Methodologist Federation Support Officer begins developing confidence in supporting federations with compliance, planning, safeguarding, and athlete pathway documents

- 3 To continue direct federation capacity-building work through individual consultations, document review, follow-up communication, and identification of practical next steps for National Federations.

Expected result — Continue supporting federations in strengthening their planning, documentation, and development processes. The focus this week included swimming, cycling, athletics, and additional communication with football and cricket stakeholders.

Success indicator — Consultations and document review and/or next steps identified, with football, swimming, cycling, and athletics Follow-up communication completed with selected federations Federations supported in understanding the purpose of shared folders and compliance documents High-performance pathway and qualification planning discussed Next steps identified for federations needing further support Connections strengthened between the DOC, National Federations, and external partners

EXECUTIVE SUMMARY

This week focused on final preparation for the Safeguarding Workshop and Olympic Values Education Programme Workshop, while continuing institutional capacity-building work with the DOC and National Federations. Time was dedicated to facilitator communication, participant coordination, support documents, and linking both workshops to governance, safeguarding, Olympic values, and youth sport development. A second focus was training the Federation Support Officer and establishing workflows for federation follow-up, document review, shared folders, reporting, and qualification pathway research. This supports federations in developing stronger high-performance and athlete pathway objectives. Capacity-building continued through follow-up with football, swimming, cycling, athletics, and cricket stakeholders, supporting relationship-building and next steps. Communication was sent to the Minister of Sports, DOC President, and Massacre facility manager regarding the urgent facility issue. Support was also provided to the Olympic Academy through agenda development, Barbados Olympic Academy connection, and follow up meetings with Thea Lafond and National Scholar Dr. Honychurch.

INITIATIVE PROGRESS

Targeted Technical Expertise & Coach Multiplication

DEVELOPMENT

In Progress

No change vs. last week

This week’s individual sessions included meetings with aquatics (review of their marketing officer documents and high performance plan for athlete preparing for CAC games), football discussion of future CAC games participation 2030 and FIFA objectives for youth which will be of age by that time), athletics (documentation check ins with General Secretary). This initiative remains active because technical expertise continues to be required to help translate broad capacity-building goals into practical documents, workflows, and federation-level actions. The work this week also helped strengthen local capacity so that the DOC can continue supporting federations beyond the Methodologist assignment.

High Performance & Institutional Capacity Acceleration

HIGH PERFORMANCE

In Progress

No change vs. last week

This initiative progressed through work connected to federation high-performance planning, qualification pathway research, and continued support to National Federations. A major focus this week was training the Federation Support Officer on how to identify qualification criteria and help federations develop forward-looking high-performance objectives. The work is intended to support federations in moving beyond event-by-event preparation and toward clearer athlete pathways, multi-cycle planning, and stronger alignment with future regional, continental, youth, and Olympic qualification opportunities. Progress also included communication and follow-up with federations including football, swimming, cycling, athletics, and cricket-related stakeholders.

Formal Government and Dominica NOC Cooperation

● In Progress

STRATEGIC

4/10

▼ 2 vs. last week

The formal MOU between the DOC and the relevant government partners remains pending. I was informed informally that the matter was expected to be on the agenda for last Tuesday's meeting, but it may not have been reached due to time or other agenda priorities. I understand that there is hope that the matter may be addressed at the next Tuesday meeting.

Shared Services and Coordination

● On Hold

ADMINISTRATIVE

3/10

No change vs. last week

The shared services initiative remains partially on hold because some of the required decisions depend on leadership-level guidance and external coordination with government or facility authorities. However, progress was made by documenting the Massacre shared facility issue and formally communicating the need for a practical resolution. This is important because shared services and coordinated access to facilities are directly connected to federation capacity, athlete development, and the ability of smaller federations to plan more effectively. Further work will be required to clarify whether the DOC can play a more active coordination role in shared space access, booking procedures, communication with facility managers, and support to federations facing similar operational barriers.

PANAM SPORTS SUPPORT NEEDED

I have developed a rough draft for responsibilities for federation support (and if appropriate, olympic academy liaison). I would really appreciate some feedback on this. I have also developing a dashboard for progress reporting by federation support officer and would appreciate feedback there.

CHALLENGES

● Medium priority ● In Progress ADMINISTRATIVE

Progress on administrative processes is slow for individual federations

Action — The Federation Support Officer should continue following up with federations, helping them identify the most urgent documents to complete, and encouraging them to use the shared folder system as an ongoing working space. DOC leadership support may help increase federation engagement and ensure that federations understand the importance of these documents for future assistance, transparency, and planning.

● Medium priority ● Pending Follow-up LOGISTICAL

Progress in identifying a clear solution for centralized shared-space booking and facility coordination has been slower than expected because several required inputs depend on external stakeholders, including facility coordinators, venue managers, and government or institutional contacts. Communication delays and difficulty confirming meetings have slowed the process of clarifying booking procedures, costs, availability, and access rules.

Action — Continue following up with facility contacts and seek support from DOC leadership where higher-level communication may help clarify access, booking authority, and possible shared-use arrangements. In parallel, continue documenting available spaces, known booking processes, federation needs, and possible coordination models so that a more complete briefing can be presented to the DOC President and Capacity Officer next week.

● Medium priority ● Pending Follow-up COORDINATION

Psychologist support for high-performance athletes was discussed based on the quote provided, but it was not approved. A group session focused on sport psychology remains under discussion as a possible alternative approach for high-performance athletes and coaches.

Action — We will explore the possibility of providing competition routine group workshops and support sessions for coaches assisting high-performance athletes. Athletes who require individual support in this area may be advised to seek out specialists in their area and request support from the DOC as needed, rather than establishing centralized individual support at this time. Group workshop pending approval/followup.

● Medium priority ● Pending Follow-up COMMUNICATION

Nominations list for Panam Sport Coaching Certification is not as as extensive as we had hoped.

Action — I have advised several strategies for motivation and promotion including short presentation of opportunity to OVEP contacts; promotion via social media post, appealing to Sports Division Officers for certification and reminding national federations to consider time commitment when nominating candidates.

NEXT WEEK FOCUS

Olympic Academy next steps and DOC support; OVEP workshop implementation and measurement; marketing team workflow; Federation Support Officer workflow and progress dashboard; AGM preparation and methodology progress report; marketing strategy and strategic planning recommendations.
