3 total engagements this week, across 2 stakeholder types.

WEEKLY PROGRESS TREND (ALL INITIATIVES)

THIS WEEK'S OBJECTIVES

- 1 Analyze and document St. Lucia's final athletic performances at the conclusion of the CAC Games in Santo Domingo.

Expected result — Official recording of St. Lucia's historic medal achievements and overall team performance benchmarks.

Success indicator — Integration of the CAC Games competition data, including the historic Netball and Sailing milestones, into our national high-performance records.

2 Evaluate the competitive gaps of the national teams that did not secure medals at the Games.

Expected result — Initial performance assessments to identify the technical and physical margins between our athletes and the podium.

Success indicator — Preparation of baseline data to be used in upcoming post-competition debriefs with the respective national coaches.

3 Maintain uninterrupted local field monitoring via the remote-hybrid framework while the primary focus is on international competition.

Expected result — The local in-house methodologist successfully executes scheduled technical monitoring with federations still preparing locally.

Success indicator — Completion of technical observation visits for the Swimming federation in St. Lucia.

EXECUTIVE SUMMARY

This week marked the conclusion of the CAC Games in Santo Domingo, highlighted by historic milestones for St. Lucia. We saw marked improvement across the board: Sailor Luc upgraded his 2023 bronze to a silver, and Netball secured a well-deserved bronze against Barbados, becoming the first St. Lucian team sport to medal at a multi-sport games. While other teams competed well, they missed the podium, providing us with vital data on competitive gaps. Locally, the hybrid methodology model succeeded, as the local methodologist continued to conduct seamless technical visits with Swimming.

INITIATIVE PROGRESS

National Elite Athlete Database & Support Project

HIGH PERFORMANCE

In Progress

No change vs. last week

The database is being updated with elite metrics gathered directly from the CAC Games. Integrating the historic medal results from Netball and Sailing, alongside the performance data from our non-medaling sports, establishes crucial new regional benchmarks for our athletes.

Methodologist Program Remote Transition

STRATEGIC

In Progress

▲ 2 vs. last week

The hybrid-remote model continues to operate flawlessly. While I focused on live competition analysis at the CAC Games in Santo Domingo, the local methodologist independently maintained the domestic ground game, ensuring uninterrupted technical monitoring for Swimming.

PANAM SPORTS SUPPORT NEEDED

Assistance in structuring advanced post-competition performance analysis. As we review the CAC Games data, guidance on specialized diagnostic tools will

help us accurately bridge the competitive gap for our non-medaling sports.

CHALLENGES

● High priority

● Pending Follow-up

TECHNICAL

While Netball and Sailing achieved historic success, the remaining teams did not secure medals despite strong performances. The challenge is objectively analyzing their competition data to identify the precise technical and physical gaps that prevented podium finishes.

Action — Initiate comprehensive, data-driven post-competition debriefs with the coaches of the non-medaling sports. We must translate their CAC Games performance data into actionable, targeted training adjustments for the next training cycle.

NEXT WEEK FOCUS

Conduct a comprehensive technical review of the CAC Games. We will celebrate the historic milestones while initiating data-driven debriefs with non-medaling coaches to address technical gaps. Continue remote support and YOG athlete monitoring.
